STAINLESS STEEL

- Weatherproof Electrical Cabinets
- Terminal & Control Enclosures
- Pneumatic Control Cabinets
- Stainless Steel Conduit Systems

ALL SIZES IN STOCK

Suitable for use in these industries

- Dairy industry
- Food processing
- Meat
- Pulp & paper
- Chemical
- Fishing
- Breweries
- Wine & Beverage
- Timber
- Mining
- Engineering
- Manufacturing
- Etc

Typical Applications

- Electric controls
- Pneumatics
- Instrumentation
- Motor starters
- Electronics

NEW ZEALAND'S LARGEST RANGE

STAINLESS STEEL WEATHERPROOF CABINETS

MAIN FEATURES: Each cabinet is complete with hinged door, gear plate, catches, earth stud and sealant. Manufactured in 18 gauge 304 stainless steel and polished finish

CABINET BODY: Consists of all welded corners and has a toughed lip around the front perimeter. 4 gear plate fixing studs are welded in the inside rear and an earthing stud on the bottom.

GEARPLATE: Made from 10 gauge (3mm) (1/8") alloy coated panel steel with stoved white painted finish. This sturdy gear plate is ideal for drilling and taping on when mounting components, especially at a later date, dispensing with the need to utilize nuts at the back.

DOOR: Is supported by two hinges and is removable by lifting vertically when open. A lip is folded into the top inside edge to prevent capillary action. A PVC flame retardant sealant resistive to fungus solvent and weather is attached to the inside of the door. Two catches are mounted on each door which is opened with a screwdriver. These may be replaced with a lock and keys as an extra.
